-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 1) Claims 10-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10, line 3, the phrase "capable of rotating" renders the claim indefinite.

Claim 10, line 6, the phrase "is capable of activating" renders the claim indefinite.

Claim 10 is not clear as to how does the photocatalytically active material is placed on the rotating member.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

- 2) Claims 10-11, 15, 22, are rejected under 35 U.S.C. 102(e) as being anticipated by Riepenhoff (7,051,652).

Claims 10-11, 15, 22: Riepenhoff discloses rotating rolls, roll 38 and 39 in a nip formation, between which is moving web 37. Rotating roll 32 having acquired a damping agent from applicator roll 36 is exposed to light from an imaging means 33, 34. A UV radiation source provides a photocatalitically active material that forms hydrophilic state and causes oxidation on surface 31 of roll 32. Roll 32 is in a nip with roll 38 to which the image is transferred, which in turn touches the moving web 37. Rotating rolls 32, 38 and 39 are rotating around their own axis, and read on rotating member (col. 10, line 61 to col. 11, line 67, and Figure 3).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made

3) Claims 12-14, 16-21, 23-29, are rejected under 35 U.S.C. 103(a) as being unpatentable over Riepenhoff.

Claim 12: it would have been obvious to one skilled in the art at the time the invention was made, to control the activation speed to obtain desired product results.

Art Unit: 1731

Claims 13-14: it would have been obvious to one skilled in the art at the time the invention was made, to control the release of the web from the surface of the rotating member based on the intensity of the light.

Claims 16-18: a roll, a paper machine and a continuous web are disclosed.

Claims 19-21, 23-24: UV light is disclosed.

Claims 25-29: it would have been obvious to one skilled in the art at the time the invention was made, to control the light source movement to obtain desired product results.

Art Unit: 1731

**Conclusion**

4) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190.
